Position Summary

Gear Energy is a public exploration and production company with heavy oil assets in East Central Alberta and Saskatchewan, light oil properties in Central Alberta and numerous emerging prospects throughout the WCSB. Our strategy for success includes organic growth for which we currently hold a multi-year inventory of repeatable prospects as well as employing a calculated approach to new oil play exploration. Decision making at Gear is value based, analytical, and collaborative. We have ambitious growth plans and are seeking more outstanding individuals to join the team.

Reporting to the VP Exploration, Gear is currently seeking a personable, motivated Geology summer student to join the team from approx. mid/late May to the end of August, 2022. The successful candidate will work with a team of professional Geologists, Engineers and Landmen to complete a number of projects designed to provide incremental value to the company.

Specific responsibilities include the following:

- Geological support and upside identification on Gear acreage and competitor/crown lands
- Collaborate with team members from different disciplines on projects that enhance Gear assets
- Basic Geological mapping, well log analysis and seismic interpretation under the supervision of technical mentors

QUALIFICATIONS:

- 3rd year Geology students who are returning to school in the fall are preferred
- Familiarity with GeoScout or equivalent mapping software would be ideal but not required
- Effective communicator, enthusiastic personality, motivated self starter, creative

Applications are being accepted until May 6, 2022 and can be submitted to info@gearenergy.com. Thank you for your interest in Gear Energy – only successful candidates will be contacted.
